## STANDARD FAMILY CODE LTHS12503SA01

| Family Type                        | LTHS 1250                            |
|------------------------------------|--------------------------------------|
| Number / Type of Poles             | 3 / NO                               |
| Mounting Position                  | Horizontal - Vertical <sup>1</sup>   |
| Control Voltage Rating Uc (DC) [V] | 24 - 36 - 48 - 72 - 110 <sup>1</sup> |
| Auxiliary Contact Blocks           | 2 x (1 NO + 1 NC)                    |
| Block Type                         | SL                                   |
| Arc-chute Material                 | Ceramic                              |
| Main Contacts Tips Material        | S6                                   |
| Arcing Contacts Tips Material      | -                                    |
| Electric Diagram                   | SC27680                              |
| Layout Drawing                     | D54978                               |

 $<sup>^{\</sup>scriptscriptstyle 1}$  To be specified in order phase.

#### Description

Contactor with double interruption in air, electromagnetic control by starter power savew system for double winding coil. Reference Standards IEC 60077, IEC 61992 and IEC 60947.

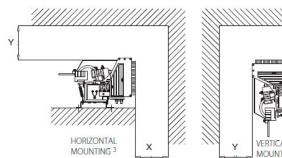

| Insulation Characteristics                                       |      |               |
|------------------------------------------------------------------|------|---------------|
| Rated Operational Voltage (AC / DC)                              | [V]  | 1800 / 900    |
| Max Operational Voltage (AC / DC)                                | [V]  | 2000          |
| Rated Insulation Voltage                                         | [V]  | 2000          |
| Rated Impulse Voltage                                            | [kV] | 12            |
| Rated Power Frequency Withstand Voltage (50 Hz for 60 s)         |      |               |
| Between HV to LV Circuit + Earth                                 | [V]  | 6000          |
| Between Open Contacts                                            | [V]  | 4700          |
| Between Each Pole (if more than 1)                               | [V]  | 6000          |
| Between LV Circuit and Earth                                     | [V]  | 1500          |
| Minimum Clearance Distance between Open Contacts                 | [mm] | 21            |
| Minimum Clearance Distance between Power Circuit to Earth        | [mm] | 14            |
| Minimum Creepage Distance between Power Circuit to Earth         | [mm] | 25            |
| Comparative Tracking Index (CTI) (IEC 60112)                     | [V]  | 600           |
| Electrical Characteristics                                       |      |               |
| Conventional Free Air Thermal Current at 40 °C²                  | [A]  | 1300          |
| Conventional Free Air Thermal Current at 75 $^{\circ}\text{C}^2$ | [A]  | 1200          |
| DC - Rated Operational Current ( $\tau = 15 \text{ ms}$ )        |      |               |
| 1800 V                                                           | [A]  | -             |
| 900 V                                                            | [A]  | -             |
| DC - Maximum Breaking Capacity ( $\tau = 5 \text{ ms}$ )         |      |               |
| 1800 V                                                           | [A]  | -             |
| 900 V                                                            | [A]  | -             |
| AC - Maximum Breaking Capacity ( $\cos \varphi = 0.8$ ; 50 Hz)   |      |               |
| 1800 V                                                           | [A]  | 2200          |
| 900 V                                                            | [A]  | 4500          |
| Component Category / Operational Frequency Class                 |      | A2 / C3       |
| Rated Short Time Withstand Current                               | [kA] | 16 (for 5 ms) |
| Critical Current Range                                           | [A]  | None          |
| Fault Making Capacity                                            | [kA] | 9.6           |
| Blow Out Circuit Type                                            |      | Indirect Coil |

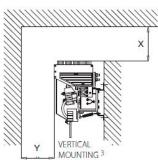

<sup>&</sup>lt;sup>2</sup> Device cabled according IEC 60947

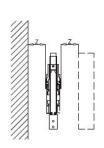

<sup>&</sup>lt;sup>3</sup> Other mounting positions not allowed, reduced distances should be approved by Microelettrica
