## N-DIN-TO64

## D.C. current relay with high sensitivity hall effect transducer

The relay N-DIN-TO64 connected to the magnetic detector TO64 allows for very accurate measurement of DC current on a rated current od over 1000A. The operation of the relay can be unidirectional or bidirectional. The rated insulation voltage of the magnetic detector TO64 is over 5 kV (dielectric test voltage $10 \mathrm{kV}-50 \mathrm{~Hz} 1 \mathrm{~min}$ or 15 kV on request).

The N-DIN relay is surface mounted on standard DIN-EN 50022 rail, but its Front-Face Panel (FFP) including Controls, Signals and Display, is removable and can be flush mounted, apart from the Relay Main Body (RMB), on the front panel of the switch board or of the MCC drawers. When removed, the FFP is connected to the RMB via a dedicated serial link by a normal wire and screw terminals. One FFP only can control and supervise up to 31 RMB units. Another RS232 port is available on the FFP front for local connection to a PC.

Similarly the RMB, besides the Serial Port connecting the FFP, has another RS485 serial port, with screw terminals, for connection to the serial bus of the DCS. The relay main body RMB can be used as a stand-alone unit, without the front panel FFP.

## Protective Functions

F64 : Two Earth fault protection element.
F51BF : Breaker Failure protection.

## Measurements

Measurement of input earth current (Primary Ampere).

## Control

2 Programmable output relay (R1, R2).
Load Profile.
Operation counters.
Event recording.
3 Digital Inputs. (Reset, Remote trip / C/B status, Blocking input)

## Technical Characteristics

FFP
Display $2 \times 16$ characters.
4 signal leds.
4 push-button.

## Communications

FFP

- RS232 serial port (front)
- 1 RS485 serial port (rear)

## RMB

1 RS485 port for connection to the communication serial bus.

- 1 RS485 port for communication to the Front Face Panel. (FFP Option).
- Communication protocol is MODBUS-RTU for all the Ports.

## Power Supply Ratings

■ Type $1: 24 \mathrm{~V}(-20 \%) / 80 \mathrm{~V}(+15 \%)$ a.c. $24 \mathrm{~V}(-20 \%) / 90 \mathrm{~V}(+20 \%)$ d.c.
Type $2: 80 \mathrm{~V}(-20 \%) / 230 \mathrm{~V}(+15 \%)$ a.c. -90V(-20\%) / $250 \mathrm{~V}(+20 \%)$ d.c.

## Mounting

- DIN46227 (EN50022)

## Software

MSCom program interface for device management.
